FEEDBACK REPORT OF ALUMNI

Session- 2018 - 2019

The feedback of alumni is very important to estimate the progress of any education institution. Keeping in view its importance, the feedback committee took a sample of opinions of few alumni.

The feedback committee has asked five questions to alumni. The first four questions are 'Yes or No' questions and the last is descriptive. These questions are strictly related to the syllabus of their respective subjects which they opted during their degree education.

The questionnaire is as follows:

Ques. 1.: How the university education helped you to seek an employment ?

Yes /No

Ques. 2.: How the university education proved useful in your social life ?

Yes /No

Ques. 3.: How the university education and the moral values it include

helped you in your overall development ? Yes /No

Ques. 4.: Does the university education enable you to lead independent and happy life ? Yes /No

Ques. 5.: Do you suggest any change/changes in Syllabus ? Yes /No

The analysis of the above questionnaire is as follows:

The response to the question is highly positive because all alumni have said that the university education has helped them to seek an employment. Ninety percent alumni have said with positive note that the university education has proved useful to them in social life. Again almost all alumni have said that the university education is useful to inculcate moral education or values in them which really proved helpful to them in their overall development. Also they have said it

with great faith in system that the university education has enabled them to lead an independent and happy life. Ten percent alumni suggest that the syllabus should be modified by keeping in view the demands of modern society.

The above analysis shows that there is no doubt that alumni look with great hope at teaching and learning process in colleges. Yet their suggestions have taken for discussion to improve the standard of teaching and learning process further.
